Lara Oliveira

UI/UX Designer | Brazil

lara.bia@outlook.com.br | LinkedIn

Professional Summary

UI/UX Designer with 5+ years of experience designing B2B SaaS and enterprise products, specializing in complex, data-intensive systems and manufacturing environments.
I work across the entire product lifecycle, from discovery and requirements definition to interaction design, functional specifications, engineering handoff, and post-launch validation.
My approach combines user-centered design, business logic, and technical understanding to transform complex workflows into intuitive and effective experiences.

Work Experience

Venturus

UI/UX Designer | 2023 - Present

- Lead the end-to-end design lifecycle for enterprise and manufacturing products, from discovery and requirements gathering to design specifications, engineering handoff, and post-launch validation.
- Translate complex business processes and operational requirements into user flows, information architecture, wireframes, and interactive prototypes.
- Collaborate with stakeholders, team leads, and developers to evaluate solutions against user needs, business priorities, and technical constraints.
- Document business rules, design decisions, and functional specifications to support consistent implementation and alignment across teams.
- Maintain and evolve design systems and component libraries.
- Collaborate with cross-functional, international teams, including product managers, developers, and stakeholders across different time zones.

Dojo Smart Ways

UI/UX Designer | 2020 - 2023

- Contributed to 10+ digital product projects, supporting product discovery, requirements gathering, information architecture, and interaction design.
- Conducted user interviews and usability testing, translating research insights into actionable design improvements.
- Designed web and mobile experiences, from low-fidelity wireframes to high-fidelity prototypes.

- Collaborated with clients, stakeholders, and developers throughout the design and implementation process.
- Designed and implemented the company's website, from initial wireframes to front-end development, applying usability, accessibility, and SEO best practices.
- Contributed to the development of the company's first Minimum Viable Product (MVP).

Education

Universidade do Estado de Santa Catarina (UDESC)

Associate's Degree | Systems Analysis and Development | 2023

Courses

Requirements Engineering | PUC Minas | 2025

Design Thinking | Grupo Voitto | 2023

Foundations of User Experience (UX) Design | Coursera 2022

Skills

Core competencies: Requirements Gathering | Product Discovery | Prototyping | User Flows | Wireframing

Tools & Technologies: Sketch | Figma | Claude Code | Agile | Version Control (Git) | AI-assisted Prototyping
